1.	AS-83	AS-81	17 Dec 48 Catalog of Crypto-equipments
			Mr. Brann Ext 388
			<p>1. In the past it has not been necessary to catalog the equipments under control of this Agency principally because of their limited number. Considering the large number of crypto-equipments now under development, it is believed that the subject catalog will soon be a necessity.</p>
			<p>2. This proposed catalog should follow the Signal Corps Supply Catalog in format and should include sufficient descriptive material to permit the using services to order equipment needed to fulfill their legal requirements.</p>
			<p>3. This catalog should not be registered and should have the lowest possible classification.</p>
			<p>4. Since the publication of this catalog involves the introduction of a new policy, coordination will be required with Army Security Agency Staff, Director of Intelligence and the using services.</p>
			<p>5. It is requested that AS-83 undertake production of this catalog.</p>
			<p>6. Mr. Brann is the coordinator on this project.</p>
