MEMORANDIM FOR CHIEF OF STAFF

Bubject: Reclassification of MSA Film "NIBSION".

- 1. The Classification Advisory Fanel met on 18 January 1955 to review the motion picture film which was recently produced by the Training Division and which is now under consideration for release to certain Service Schools.
- 2. This film is now classified TOP SECRET and if this classification were maintained this would obviously greatly restrict the usefulness of the film for Service Schools.
- 3. A. The Advisory Fanel considered the matter with the view toward ascertaining whether the film sculd be downgraded to SECRET or even to CONFILMITIAL. The Fanel regarded the latter classification entirely too low and it was eliminated from further consideration.
- b. The Panel was divided in its opinion with respect to the advisability and paraissibility (under current USCIB Directive No. 16, approved 29 December 1954) of downgrading the film to EECRET.
- g. Moreover, there was some expression of opinion as to the desirability of showing the film, at least in its present state, to Service Schools because of doubts as to its suitability to the purpose in mind in showing it in the first place. The Panel felt that the film attempts to convey much more information within one hour than can possibly be conveyed, and that the quality of the production should be improved before releasing the film to any groups outside MSA.

A. The Panel discussed a guggestion that guidance and assistance, in respect to the question of proper elassification of the film, must be sought from the Security Committee of USCIB. This suggestion met with unanimous concurrence. Accordingly, it is recommended that the mambers of the Security Committee be invited to view the film and render its epinion as to the securecy of its present classification or its possible modification so as to parmit a lower classification

WILLIAM F. PRIRIMAN Chairman Classification Advisory Fanel
