MEMORANDUM FOR DIRAFSA

SUBJECT: Proposed Global Structure for U.S. Military COMINT Activities.

Enclosure: (A) Global Plan for Control, Coordination and Support of U.S. COMINT Activities.

1. In preparation for the forthcoming discussions relative to drawing up plans for a [redacted] global COMINT structure, it is essential that a U.S. global structure first be decided upon. As a basis for development of the latter, there is submitted herewith, as enclosure (A), a proposed global plan for control, coordination and support of U.S. military COMINT activities (i.e. those under jurisdiction of the Department of Defense.)

2. The enclosure is intended to show the normal control and support relationships among AFSA, the Service cryptologic agencies, the several unified commands, and such individual service commands as might exist. The enclosure has been designed to bring out the parallelism between the several echelons of the COMINT structure and those of the unified and Service operating command structures which are to be served by the COMINT activities. Where the military departments are shown, these of course, include the intelligence components thereof.

3. The proposed plan conforms to the recommended principles for division of responsibilities between AFSA and the service cryptologic agencies, as set forth in AFSAC 60/26.
