

BORIS GELIN

Sundsvik, Sept. 7th, 1963.

Dear Bill: ...

Many thanks for your kind letter of Sep. 1st, and please thank also Elizebeth for her postscript.

First of all I now also want to thank you for Pearl Harbor. It was not - as you rightly presumed - autographed, but perhaps you could get for me a short autograph, on a slip of paper, which I could then paste on to the front leaf?

In exchange for the book I have just got another book for you: Christopher Polhem, the Father of Swedish Technology. I think that you should find this interesting.

It is now about a fortnight until I and Sture expect to be in Zug, and I think that we could save our talks until then. You heard perhaps that Bo will arrive in Zug with a couple of boys from Washington DC on the 23rd, and some of our problems will probably be settled, one way or another, during this visit.

We have had a rather variable weather, yesterday an awful downpour, but today fine weather. We have had to see a lot of people since our return to Fryksås, and the next week - my last in Sweden - will be rather crowded. So I really look forward to the trip by car to Switzerland with pleasure.

We were happy to hear that you liked Visby. It is:

a delightful town, and we shall try to pay visit to it next summer. If I feel up to it, I will participate in the regatta to Visby then, and Annie would in that case join me there. Well, all depends...we are not getting any younger, but we hope that our health will continue good for some years to come.

And so we hope that this finds you both in good health and spirits.

Affectionately

Annie and
